Who This Is For

You're a startup founder or ops lead drowning in repetitive manual work — chasing leads, updating CRMs, answering the same support questions. You've heard AI can help, but you're not sure where to start.

This guide gives you five battle-tested automations, the exact tools to implement them, and a step-by-step checklist for each. No fluff. No theory. Just deployable systems.

How to Use This Guide

- 01 Read through all 5 automations once for the big picture.
- 02 Pick the automation that saves you the most time first.
- 03 Follow its checklist top-to-bottom — each step is actionable.
- 04 Book a free audit call if you need help with implementation.

COMBINED TIME SAVINGS

33+ hours / week

Based on conservative estimates. Most clients report higher savings.

AI Voice Lead Qualification

10 hrs / week

Intermediate

VAPI

OpenAI

HubSpot

n8n

Deploy a 24/7 AI voice agent that calls inbound leads within 60 seconds, asks qualification questions, scores them, and pushes qualified leads straight to your CRM — while you sleep.

Implementation Checklist

01

☐

Create a VAPI account and set up a new assistant

02

☐

Write your lead qualification script (5–8 questions max)

03

☐

Configure call triggers: inbound webhook or Calendly no-show

04

☐

Map VAPI output fields to your CRM (name, email, score)

05

☐

Build n8n workflow: VAPI webhook !' score logic !' CRM create/update

06

☐

Test with a real phone number end-to-end

07

☐

Set up Slack alert for qualified leads

Email-to-CRM Auto-Sync

5 hrs / week

Beginner

n8n

Gmail API

HubSpot

OpenAI

Every inbound email from a prospect automatically creates or updates a CRM contact, logs the thread, and tags it by intent — so your pipeline stays clean without anyone touching it.

Implementation Checklist

01

☐

Connect Gmail to n8n via OAuth2

02

☐

Set trigger: new email in Inbox matching domain filter

03

☐

Use OpenAI to classify intent (lead / support / spam)

04

☐

Create n8n branch: if lead != upsert CRM contact

05

☐

Log email subject + snippet as CRM activity note

06

☐

Apply CRM tag based on intent classification

07

☐

Test with 3 sample emails across different intents

Inbound Support Bot

8 hrs / week

Intermediate

OpenAI

n8n

Zendesk

Notion

An AI chatbot handles tier-1 support questions 24/7, pulling answers from your knowledge base. Only tickets it cannot resolve get escalated to your team — cutting support volume by 60–70%.

Implementation Checklist

01

☐

Export your top 50 FAQ answers into a Notion database

02

☐

Build an OpenAI assistant with your knowledge base attached

03

☐

Create n8n workflow: new ticket !' query assistant !' post reply

04

☐

Add confidence threshold: if score < 0.7, escalate to human

05

☐

Connect escalation path to Slack #support channel

06

☐

Set auto-close rule for tickets resolved by bot

07

☐

Monitor first 50 bot responses and refine knowledge base

Slack Ops Notifications

4 hrs / week

Beginner

n8n

Slack API

Stripe

PagerDuty

Critical business events — new paying customer, churn risk alert, server error spike — automatically post to the right Slack channel with context, so your team reacts in minutes not hours.

Implementation Checklist

01

☐

Map your top 5 business events that need instant visibility

02

☐

Create dedicated Slack channels per event type (#new-customers, #alerts)

03

☐

Build n8n workflow per event source (Stripe webhook, error logs, etc.)

04

☐

Design Slack message template with emoji, amount, and action link

05

☐

Add deduplication logic to prevent alert storms

06

☐

Test each trigger with a sandbox event

07

☐

Document the alert runbook in Notion for your team

Outbound Follow-up Sequences

6 hrs / week

Intermediate

n8n

OpenAI

HubSpot

Gmail API

Leads who go cold after an initial call get an automated multi-touch follow-up sequence — personalised using their CRM data — that runs for 2 weeks before gracefully giving up.

Implementation Checklist

01

☐

Define follow-up trigger: deal stage = "No Response" for 3+ days

02

☐

Write 3 email templates (Day 3, Day 7, Day 14) in plain text

03

☐

Use OpenAI to personalise first line from CRM notes

04

☐

Build n8n sequence with delays between each send

05

☐

Add unsubscribe / reply detection to stop sequence early

06

☐

Set CRM deal stage to "Closed Lost" after sequence ends

07

☐

A/B test subject lines after 50 sends

Your Automation ROI

Based on a conservative \$50/hr blended rate. Your numbers may vary.

Automation	Hrs / Week	Hrs / Month	Value / Year
AI Voice Lead Qualification	10 hrs	40 hrs	\$24,000
Email-to-CRM Auto-Sync	5 hrs	20 hrs	\$12,000
Inbound Support Bot	8 hrs	32 hrs	\$19,200
Slack Ops Notifications	4 hrs	16 hrs	\$9,600
Outbound Follow-up Sequences	6 hrs	24 hrs	\$14,400
TOTAL	33 hrs	132 hrs	\$79,200

Use the interactive ROI calculator at shahzaibbuilds.me to enter your own numbers.

Ready to Deploy These Automations?

These checklists show you what to build. But knowing what to build and actually deploying it are two different things.

If you'd rather skip the setup headaches and have a custom automation running in days — that's what I do.
