// ABOUT THIS GUIDE

# Who This Is For

You're a startup founder or ops lead drowning in repetitive manual work — chasing leads, updating CRMs, responding to the same support questions. You've heard AI can help, but you're not sure where to start.

This guide gives you five battle-tested automations, the exact tools to implement them, and a step-by-step checklist for each. No fluff. No theory. Just deployable systems.

// HOW TO USE THIS GUIDE

- 01 Read through all 5 automations once.
- 02 Pick the one that saves you the most time first.
- 03 Follow the checklist top-to-bottom.
- 04 Book a free audit if you need implementation help.

// TOTAL TIME SAVED ACROSS ALL 5 AUTOMATIONS

**33+ hours / week**

// AUTOMATION 01 OF 05

# AI Voice Lead Qualification

Deploy a 24/7 AI voice agent that calls inbound leads within 60 seconds, asks qualification questions, scores them, and pushes qualified leads straight to your CRM — while you sleep.

#ñ 10 hrs / week

Intermediate

TOOLS:

VAPI

OpenAI

HubSpot

n8n

---

## // IMPLEMENTATION CHECKLIST

- ☐ 01 Create a VAPI account and set up a new assistant
- ☐ 02 Write your lead qualification script (5–8 questions max)
- ☐ 03 Configure call triggers: inbound webhook or Calendly no-show
- ☐ 04 Map VAPI output fields to your CRM (name, email, score)
- ☐ 05 Build n8n workflow: VAPI webhook !' score logic !' CRM create/update
- ☐ 06 Test with a real phone number end-to-end
- ☐ 07 Set up Slack alert for qualified leads

// AUTOMATION 02 OF 05

# Email-to-CRM Auto-Sync

Every inbound email from a prospect automatically creates or updates a CRM contact, logs the thread, and tags it by intent — so your pipeline stays clean without anyone touching it.

#ñ 5 hrs / week

Beginner

TOOLS:

n8n

Gmail API

HubSpot

OpenAI

## // IMPLEMENTATION CHECKLIST

- ☐ 01 Connect Gmail to n8n via OAuth2
- ☐ 02 Set trigger: new email in Inbox matching domain filter
- ☐ 03 Use OpenAI to classify intent (lead / support / spam)
- ☐ 04 Create n8n branch: if lead !' upsert CRM contact
- ☐ 05 Log email subject + snippet as CRM activity note
- ☐ 06 Apply CRM tag based on intent classification
- ☐ 07 Test with 3 sample emails across different intents

// AUTOMATION 03 OF 05

# Inbound Support Bot

An AI chatbot handles tier-1 support questions 24/7, pulling answers from your knowledge base. Only tickets it cannot resolve get escalated to your team — cutting support volume by 60–70%.

#ñ 8 hrs / week Intermediate

TOOLS:

OpenAI

n8n

Zendesk

Notion

## // IMPLEMENTATION CHECKLIST

- ☐ 01 Export your top 50 FAQ answers into a Notion database
- ☐ 02 Build an OpenAI assistant with your knowledge base attached
- ☐ 03 Create n8n workflow: new ticket !' query assistant !' post reply
- ☐ 04 Add confidence threshold: if score < 0.7, escalate to human
- ☐ 05 Connect escalation path to Slack #support channel
- ☐ 06 Set auto-close rule for tickets resolved by bot
- ☐ 07 Monitor first 50 bot responses and refine knowledge base

// AUTOMATION 04 OF 05

# Slack Ops Notifications

Critical business events — new paying customer, churn risk alert, server error spike — automatically post to the right Slack channel with context, so your team reacts in minutes not hours.

#ñ 4 hrs / week Beginner

TOOLS:

n8n

Slack API

Stripe

PagerDuty

## // IMPLEMENTATION CHECKLIST

- ☐ 01 Map your top 5 business events that need instant visibility
- ☐ 02 Create dedicated Slack channels per event type (#new-customers, #alerts)
- ☐ 03 Build n8n workflow per event source (Stripe webhook, error logs, etc.)
- ☐ 04 Design Slack message template with emoji, amount, and action link
- ☐ 05 Add deduplication logic to prevent alert storms
- ☐ 06 Test each trigger with a sandbox event
- ☐ 07 Document the alert runbook in Notion for your team

// AUTOMATION 05 OF 05

# Outbound Follow-up Sequences

Leads who go cold after an initial call get an automated multi-touch follow-up sequence — personalised using their CRM data — that runs for 2 weeks before gracefully giving up.

#ñ 6 hrs / week Intermediate

TOOLS:

n8n

OpenAI

HubSpot

Gmail API

---

## // IMPLEMENTATION CHECKLIST

- ☐ 01 Define your follow-up trigger: deal stage = "No Response" for 3+ days
- ☐ 02 Write 3 email templates (Day 3, Day 7, Day 14) in plain text
- ☐ 03 Use OpenAI to personalise first line from CRM notes
- ☐ 04 Build n8n sequence with delays between each send
- ☐ 05 Add unsubscribe / reply detection to stop sequence early
- ☐ 06 Set CRM deal stage to "Closed Lost" after sequence ends
- ☐ 07 A/B test subject lines after 50 sends

// ROI SUMMARY

# Your Automation ROI

Based on a conservative \$50/hr blended rate. Your numbers may vary.

| Automation                   | Hrs / Week | Hrs / Month | Value / Year |
|------------------------------|------------|-------------|--------------|
| AI Voice Lead Qualification  | 10 hrs     | 40 hrs      | \$24,000     |
| Email-to-CRM Auto-Sync       | 5 hrs      | 20 hrs      | \$12,000     |
| Inbound Support Bot          | 8 hrs      | 32 hrs      | \$19,200     |
| Slack Ops Notifications      | 4 hrs      | 16 hrs      | \$9,600      |
| Outbound Follow-up Sequences | 6 hrs      | 24 hrs      | \$14,400     |
| TOTAL                        | 33 hrs     | 132 hrs     | \$79,200     |
